

Managed IT Services

BLACKPOINT
IT Services

Comprehensive Operational Support

BlackPoint's proactive approach ensures peak performance, enhanced security, and uninterrupted operations, allowing your business to thrive without IT disruptions.

Our Managed Services include:

Service Desk

24/7 support for seamless operations and quick issue resolution for all applications.

Email Security Management

Advanced email security to protect against phishing, spam, and other threats.

Patching

Automated and technician-managed updates for Microsoft, Windows, Mac, and 3rd applications, keeping your systems secure and up-to-date.

Firewall and Network Device Monitoring & Management

Advanced 24/7 monitoring of Firewalls/ISP, core switches, VPNs, VLANs, hosts, UPS, printers, and more. Includes configuration backup and firmware updates.

EPP Management

Trust our IT experts for antivirus deployment, configuration, updates, and real-time monitoring to ensure immediate threat response.

M365 Management

As a Microsoft Partner, let us handle user management, troubleshooting, and optimization of your Microsoft 365 tenant and users so you don't have to.

Dedicated vCIO

Count on our vCIOs as your strategic partners to develop and implement IT roadmaps that align with your long-term business goals.

Preferred Rate Services

Access skilled IT professionals at preferred rates for projects, staffing, or specialized coaching, all within your budget.

Comprehensive System and Application Management

End-user support for on-prem and cloud applications, asset management, troubleshooting, and vendor coordination. (Windows, Mac, Linux)

Co-Managed Services

BLACKPOINT
IT Services

Collaborative IT Support

BlackPoint's Co-Managed Services allow businesses to partner with us while retaining some IT functionality and responsibility in-house. We provide flexible support to enhance your existing IT capabilities.

Our Co-Managed Services include:

Monitoring and Asset Management

24/7 monitoring and technician-managed critical issue notifications for all critical systems (Windows, Mac, Linux) using RMM tools.

Tailored Support

End-user support for on-prem and cloud applications, asset management, troubleshooting, and vendor coordination. (Windows, Mac, Linux)

Automated Patching

Automated and technician-managed updates for Microsoft, Windows, Mac, and 3rd party applications, keeping your systems secure and up-to-date.

M365 Management

As a Microsoft Partner, let us handle user management, troubleshooting, and optimization of your Microsoft 365 tenant and users so you don't have to.

Firewall and Network Device Monitoring & Management

Advanced 24/7 monitoring of Firewalls/ISP, core switches, VPNs, VLANs, hosts, UPS, printers, and more. Includes configuration backup and firmware updates.

Access to Tools

Leverage advanced tools for remote management, network monitoring, dashboards, and reporting to enhance your IT service delivery.

Dedicated vCIO

Count on our vCIOs as your strategic partners to develop and implement IT roadmaps that align with your long-term business goals.

Preferred Rate Services

Access skilled IT professionals at preferred rates for projects, staffing, or specialized coaching, all within your budget.

Advanced Security Services

BLACKPOINT
IT Services

Comprehensive Cybersecurity Services

24/7 365 protection. Nobody can guarantee you will not be hit with a cyberattack, but if you are, we will get you back up and running with no extra fees or costs.

Our Advanced Security Offering include:

Endpoint Detection and Response

SOC Analysts monitor for breaches, isolate systems upon detection, and integrate with anti-virus and anti-malware for comprehensive endpoint protection.

Annual Security Reviews and Recommendations

We offer tailored Annual Security Reviews and Recommendations to strengthen your cybersecurity defenses with expert assessments and strategic improvements.

24/7 Support

Our dedicated team of experts will handle all your inquiries and issues 24/7.

Inclusive Remediation with the BlackPoint Guarantee

At BlackPoint IT Services, we understand the importance of keeping your business safe from cyber threats. That's why we offer 24/7 protection and support, 365 days a year. Our comprehensive cybersecurity services are designed to give you peace of mind, knowing that our dedicated team of experts is always on hand to handle your inquiries and issues.

Our endpoint detection and response system is monitored by SOC analysts, who quickly isolate systems upon detection of a breach and integrate with anti-virus and anti-malware software for comprehensive endpoint protection. We also offer annual security reviews and recommendations, tailored to your business, to help you strengthen your cybersecurity defenses with expert assessments and strategic improvements.

Hosted Voice Services

BLACKPOINT
IT Services

Optimized Communication

Streamline business communications using a robust hosted phone solution without the high capital expenditure.

Our Hosted Voice Services Include:

System Monitoring and Analytics

Keep everything on track with our monitoring and analytics tools, improving call scheduling and handling.

24/7 Support

Our dedicated team of experts will handle all your inquiries and issues 24/7.

Contact Center

Support customer interactions across voice calls, email, web chat, and SMS, with screen pop integration for better customer service.

Teams Integration

Seamlessly integrate hosted voice with Microsoft Teams for direct dialing, voicemail, and call forwarding.

Technology Migration

Our telecom experts simplify your migration to hosted voice, handling all needs from start to finish.

Unified Communications

Future-proof your system with enhanced calling, unified messaging, call recording, SMS, conference calling, and more.

Customizable Coverage

Easily manage your phone system with our support for adds, moves, and changes.

Onboarding and Training

We help you deliver the best customer experience by educating and training your end user rather than trying to do it yourself.

BlackPoint IT Services XDR Cybersecurity Solutions

BLACKPOINT
IT Services

Extended Detection and Response

The Extended Detection and Response (XDR) Endpoint Solution offers unbeatable threat detection and remediation by integrating data from multiple security sources.

BlackPoint XDR SOLUTIONS

BlackPoint XDR + Compliance Solution

Combines Endpoint XDR Protection with 24/7 SOC-managed endpoint isolation, MDR for Firewall & M365, SIEM integration across multiple platforms, and unified threat hunting across Kaseya 365 and other integrated solutions.

Endpoint XDR

protects your business with 24/7 support, ransomware defense, automated management, and secure backup, meeting cyber insurance requirements.

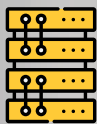

Choose **BlackPoint IT Services XDR Solutions** for the ultimate protection for your business.

- **Two types of protection:** Endpoint XDR Protection and Endpoint XDR + Compliance Solution, which integrate data from multiple security sources and offer 24/7 support.
- **Endpoint XDR Protection** includes ransomware defense, automated management, endpoint backup, documentation and password management portal, and meets cyber insurance requirements.
- **Endpoint XDR + Compliance Solution** adds endpoint isolation, MDR for Firewall and M365, SIEM integration, and unified threat hunting to the Endpoint XDR Protection features, and ensures compliance with various standards.
- All **BlackPoint IT XDR Customers** get access to additional tools such as remote management and monitoring, 365 tenant management, documentation management, and password manager.
