Protect your business from evolving cyber threats with WatchGuard's integrated security solutions. Simplify security management, reduce risks, and ensure smooth, uninterrupted operations.

WatchGuard Advanced Security Features

Firewall

WatchGuard Total Security is an all-in-one firewall solution offering AI-powered threat detection, DNS filtering, and Cloud sandboxing. It protects against sophisticated threats like ransomware, phishing, and malware.

Multi-Factor Authentication

WatchGuard MFA provides secure, multi-layered protection with push notifications, time-based passcodes, and QR code authentication. Device DNA ensures that only authorized devices can generate access codes, blocking attempts from cloned or compromised devices.

Single Sign-On

WatchGuard SSO simplifies access by allowing users to log in once to multiple applications, reducing password fatigue and minimizing the need for multiple credentials.

Cyber Insurance

WatchGuard security solutions enhance your eligibility for affordable cyber insurance by strengthening your security posture, lowering premiums, and reducing potential financial losses from cyberattacks.
